

# Advanced Coating Workshop

## About the Advanced Coating Workshop

---

*Who is this 1 day workshop for?*

We all realise that coatings form a small part of the total cost of an installation, resand or recoat of a floor, yet all too often determine the acceptability of the job. A contractor will often use what they believe to be good practice, yet the job turns out unsatisfactory due to coating related issues.

This workshop will provide for an intensive appreciation of coatings so as to enable coating with confidence. The AFTA Coatings manual will be used as the course text and will provide for an understanding of coating type differences, factors that affect coating behaviour and devote significant time to understanding the 'why' and not just the 'what' of coating related quality issues. The diagnostic trouble shooting will be a significant part of the workshop and cover the facts behind issues such as ghosting, edge bonding, tannin staining, delamination and compatibility, rejection, application marks, and more.

**This course will be ideally suited to sanders and finishers, training instructors, flooring inspectors, manufacturer technical and sales personnel, key contractors, wholesalers, suppliers, industry technical committee personnel and any others involved in the understanding and investigation of why coatings may behave in a certain manner.**

## Registration – Fax back to us on 1300 36 1793
